

DIGIGONE OVERVIEW

Low-cost Secure Internet Communication, Secure File Transfer and Anonymous Web Browsing

DigiGone T3 is a complete, low-cost and practical software and server-managed solutions that provide secure communications, anonymous Internet surfing and undetected computer usage tools. Clients can use our servers or deploy their own and self-manage hundred of keys at a time. Communicate with clients, sources, or high-risk target without trace evidence. DigiGone T3 can be installed on a USB memory key or other USB device. All software and updates are included for a year. Preloaded with all necessary software and tools:

Use DigiGone from any Windows© - based computer system. *All you need is the DigiGone T3 Key and an Internet connection. No need to carry your own laptop! Use it anywhere you can plug the DigiGone Key into a Windows© - supported USB port. DigiGone for Windows XP version and soon Windows Vista©. The newest version is now available for Windows Mobile 6 PDAs and cellular phones.*

Secure chat with conference chat and secure file transfer protocols (FTPs) to chat members. *Just plug in your DigiGone T3 Key, and then text chat and pass information securely with other key holders, using 256-bit and password encryption. We also offer a secure "Chat Only" Key. DigiGone T3 is now available with encrypted VOIP mode for secure voice communications.*

Erase all record of your computer usage activity. *Need real privacy, whether you're using your own computer or borrowing someone else's? No problem. Just insert your DigiGone T3 Key, conduct your business and when you've finished, there is no trace evidence left on the computer. Perfect for sensitive field operations personnel.*

Secure file transfer protocol (FTP), with up to 256-bit and password encryption. *Send sensitive data with up to 256-bit and password encryption.*

DigiGone T3 offers a truly anonymous presence while on a computer system Web surfing, transferring files and text chatting. DigiGone T3 is the most secure means now available for low-cost and secure I.P. communications and access.

True anonymous Internet surfing capability with identity and location masking. *DigiGone allows the user to be completely anonymous while surfing the Internet. DigiGone T3 offers an automatic, built-in and truly anonymous web browser. No software to load on a computer!*

Internal and external privacy protection with remote and self-destruct capabilities. *DigiGone T3 gives you complete privacy protection. Type a self-destruct command anywhere in its windows while you're working, and it completely wipes the operating software from the Key. DigiGone T3 can also be remotely commanded to immediately erase all of its programs and stored data if it's plugged into an Internet-linked computer by an unauthorized person.*

Electronic "dead drop" service: *Need to leave information somewhere, securely protected? DigiGone T3 offers an electronic "dead drop" where you can send DigiGone's encrypted information, to be held securely for a set period of time, then retrieved either by yourself, your agency or a third party. The sender and receiver don't need to know each other, where the information comes from or goes to, only the right access codes.*
