

## SMS Mobile OVERVIEW

### SMS Mobile

A turnkey direct-field Sound Masking System (SMS) for busy executives and travelers who need to speak in private.

SMS Mobile achieves a high degree of speech privacy using a non-correlated voice generator to mask normal voice within a room. Sample male and female voices are preloaded.

Custom, user-specific voice masks can be made to ensure maximum security. Reducing the intelligibility of a conversation is important to maintain privacy. This is generally best accomplished by creating voice masks that mirror the person speaking.

Simply turn on SMS Mobile and place it against the wall or door. Audio generated through speaker will vibrate the structure it's placed against making it very difficult for someone else to listen to your sensitive conversation.

*Mobile speech privacy cannot get any easier than this.*

#### Features

- ▷ Battery operated
- ▷ Hands-free Amplifier
- ▷ 7 Watt generator
- ▷ Compact Size / Weight
- ▷ 82.5dB/W +2cb SPL
- ▷ Simple to use
- ▷ 30 Hours operating Time
- ▷ Excellent Sound Quality
