SES for any audio platform**

THE MOST POWERFUL SPEECH EXTRACTION SYSTEM IS NOW INTEGRATED

All the power of SES in a simple, affordable, multi-channel package

Introducing ClearChannel—cutting edge audio clean up for everyday use

ClearChannel gives you the power of the real-time and fully adaptive dynamic speech extraction engine from SES, optimized for a fully automated and affordable live solution, presented in a one button, high performance package. If you are listening to noisy or hard to understand audio on a daily basis, ClearChannel is the perfect integrated tool for any audio platform.

With ClearChannel you don't have to be an audio expert to get results like one.

ClearChannel features include:

- Real-time advanced speech extraction made simple: press one button to remove almost any kind of audio problem from your channel.
- Simple interface: operators can focus on the task at hand, get more done faster and get better results with less fatigue.
- No training required: install ClearChannel, turn it on and hear the results.
- Affordable and scalable: designed to integrate into most existing audio platforms. No additional hardware required and priced to fit your budget.
- Software based solution: regularly updated to tackle your ever-changing audio clean up challenges. Your investment is safe from obsolescence.

SES For The Lab, ClearChannel For The Field

SES is the most advanced and complete audio recovery tool available to Law Enforcement and Government clients. When you need the power of SES but don't have the time to train, don't need a full lab system, or are faced with many channels of audio, ClearChannel is the affordable solution. As the number of channels and the demand on your time grows, ClearChannel comes to the rescue and lets you do even more with less.

Integrate the Power of Full Auto From SES

ClearChannel uses the same multi-module, intelligent frequency domain SES engine to analyze the incoming audio and select the best tools for the particular audio material. Just turn on ClearChannel and select the amount of noise reduction. ClearChannel can

automatically separate speech signal from all forms of noise, ranging from tones and clicks to broadband noise. And the results are optimized for maximum speech intelligibility.

Get More of The Best Audio Enhancement

ClearChannel is the superior, affordable alternative to redundant hardware systems for integrated audio enhancement and is site license optimized for large channel and unit count scenarios. ClearChannel runs on existing hardware and is unrivaled in both cost per channel and performance.

Get The Most Out of Your Audio Platform

ClearChannel lets you get more out of your existing investment by recovering more speech than was previously possible, better voice recognition and pattern matching, and less fatigue for the operators who listen all day. ClearChannel can significantly enhance the power and usefulness of your existing systems. ClearChannel is designed for drop-in integration with minimal effort. Ask your system vendor for ClearChannel.
