

M2 SOUND MASKING SYSTEM OVERVIEW

The M2 Sound Masking System (SMS)

M2 is an advanced, turnkey speech masking platform incorporating state-of-the-art technology and packaging. The system helps protect sensitive conversation from being inadvertently overheard by passersby's. When speech privacy is critical, select the M2 option for the ultimate in performance.

The M2 has been designed for both deployable and fixed facility installations. The lightweight system sets up in minutes and can provide real-time or continuous speech and/or noise generation.

Custom packaging and configurations are available to meet any size facility or deployment scenario. A must have for secure conference rooms, secure discussion areas and travel security.
